

Agenda Template

Agenda [Meeting name]

Location: Drebbelweg PCHall 1 Cubicle 1

Date: 21-2-2023

Time: 13:45 – 14:30

Attendees: Tudor, Filip, Sander, Ruben, Yurian, Rares, Khalid

Approval of the agenda

- No additions to the agenda

Product demonstration

- Add “Help” button

Announcements

- Change in deadlines (very likely)
- Watch out for failing pipeline on last day

Deadlines

- Today: Heuristic evaluation
- Friday: Product pitch (10 am)
-

This week's focus

- Finish each team's epics
- Focus on bugs
- Add JavaDoc (Sander)
- Tudor: Add common functionality
- Add alerts before closing the app, delete boards etc (Filip)

- Ruben: make names not be empty through UI and max N characters
- Add Icons (Filip)
- Make it possible to change texts via enter (Tudor)
- Backspace not working in quick add card (Rares)
- Leaving board after adding card (Yurian)
- Make names of files consistent (Sander)

Questions for the TA

- How can we ask Sebastian to look at our app? Send a message via mattermost or go upstairs, project room and hunt him down (TA said it is fine)
- Can show all the backlog features but only talk about extra features? Show every feature that we should have according to the backlog and focus on extra features at the end. Make sure that all elements in the “implemented features” rubric are in the product pitch. We have to show our features completely (we go step by step). For unique features, make it explicit at the end of the product pitch
- We can't really get to 80% coverage due to a lot of JavaFX that can't be tested. What do we do? Khaled will get back to us (usually you can exclude files from coverage so they don't interfere with the coverage calculation)
- The process is not replicable, how do we improve? The forms are fine.
