

Agenda OOPP Meeting

Agenda

Location: Drebbelweg PC Hall 1
Datum: 28-03-2023
Time: 13:45 – 14:30
Attendees: Ruben, Yurian, Tudor, Sander, Filip, Rares

Agenda-items

- [13:45-13:46] **Opening by chair. Check-in** – How is everyone doing?
- Everyone is doing good.
- [13:46-13:47] **Approval of the agenda**
- Everyone approved the agenda.
- [13:47-13:49] **Product demonstration**
- We added drag and drop, password login, almost instant synchronization between clients, and also improvements on card details.
- [13:49-13:57] **Announcements**
- No announcements from chair
- TA Announcements**
- We have 10 more days until the repositories become read only.
 - There is feedback for the heuristic usability evaluation on brightspace.
 - Do we use Jackson? It is implicitly used.
 - Our current contributions: unequal, they need to be equal as soon as possible. We need to think of how to split tasks in such a way that everybody gets the same contribution, otherwise some will fail.
 - Meetings will be reduced to 25 minutes instead of 45 minutes starting next week.
- [13:58- 14:05] **[Agenda-item 1] – [Deadlines]**
- *Final version of heuristic evaluation deadline (April 7)*
 - o *Has everyone completely read the report? Yes.*
 - o *Improvement? Fix figure references and look at the grading rubric on brightspace and improve specifically on what is not currently “excellent”/ “good”*

- *Teamwork self reflection draft (March 31)*
 - o *Everyone writes a self-reflection about three specific situations: everyone still has to read the requirements on the website.*
 - o *Judged by pass/fail.*
- *Product pitch draft (March 31)*
 - o *We should work on it this week.*

[14:01-14:03]

[Agenda-item 2] — [Progress on milestones]

- Rares and Yurian are almost done.
- Tudor and Sander are done with the code and need to implement the UI.
- Filip and Ruben have problems with injections but are almost done too.
- **We need to re-edit cards to store the priority of the cards for drag&drop purposes (critical — basic application).**

[14:04-14:05]

[Agenda-item 3] — [What are we focusing on this week?]

- We will focus on the remaining 3 epics.
- Final additions to the project should be a different milestone to take care of (e.g., not allowing empty cards to be added).

[14:06-14:26]

Question round - Does anyone have anything to add before the meeting closes?

- Questions for the TA:
 - o Is setter dependency injection fine? We shouldn't worry about it too much.
 - o Is only testing javafx services acceptable? TA will ask — we need to send the URL of our file and receive an answer.
 - o Brightspace feedback:
 - Tasks and Planning: we improved a lot, looks much better than what was initially shown.
 - Technology: we also improved as now everything that we did regarding tech was explained to the TA.

[14:27-14:28]

Feedback round - What went well and what can be improved next time?

- This was discussed by the TA in the previous agenda item.

[14:29-14:30]

Closure
